floor signage

brick/masonry

exterior applications.

Vu-Thru Perforated Window Vinyl

Available in two options; a 50/50 selection allows more transmission of light and the 60/40 selection provides more printable surface area for a more vibrant print. Sample below is 60/40 vinyl.

Various Vinyl Grades

Length of use, exposure to environmental elements, conformability, UV durability, ease of application are all factors in determining the proper vinyl to fill your needs. Based on the application needed for a particular project, material cost vary from unlaminated, calendered vinyl for short term, inexpensive uses to premium repositionable cast vinyls used in vehicle wrap applications.
